

Permanent COSMETIC TATTOOING

Women have beautified their eye and lips for centuries. Now modern science and cosmetology have merged to create a technique for enhancing ones natural features and replace traditional cosmetics.

Is it Safe?

Rest assured that our highest concern is safety and sanitation for our clients. All equipment is sterilized or used one time and disposed of after each cosmetic tattoo procedure. This procedure is done in a clean and sanitary environment and the risk of communicable diseases are remote, if not impossible.

Does it Hurt?

An application of topical anesthesia is applied during the treatment to greatly reduce the sensation of the procedure.

Who Would Benefit from Permanent Makeup?

Everyone from the young to the elderly, who desire a natural enhancement to their appearance.

Those who...

- Want to save time each day
- Have sparse or very light eyebrows
- Are allergic to makeup
- Have ultra-sensitive eyes
- Have little time to re-apply makeup
- Desire freedom and convenience from daily makeup applications
- Want the convenience of makeup that won't smudge, smear, or wear off

Eyebrows

Eyebrows are softly feathered with fine lines simulating a natural contour while hair strokes mimic the appearance of hair in the browline. A combination of custom-blended pigment shades will allow a dimensional look.

\$350

Eyeliner

Eyeliner can be applied in any color for a soft natural enhancement or for a more defined line. Small amounts of pigments are applied at the base of the lashline, making lashes look fuller. A solid line, small dots or a soft smudge look can be achieved.

\$350 Top and Bottom

Lip Color

Lip liner and shading corrects asymmetry and adds definition and fullness. Depending on preference, color on the lips can be a natural light color, or more heavy and defined. It can correct uneven lips or even reshape to a desired look.

\$400*

**Price reflects one retouch 6 weeks after initial application.*
